

【Slide 1 & Slide 2】

"Good morning! Welcome to the roadshow for the Tactical ESG Strategy Fund. We are FinAI Innovators. My name is Liu Junyou, and I am joined by my partners Jin Zhiyang, Darryl, and Alvin. "

【Slide 3】

"We believe ESG is the biggest investment opportunity of our generation. But to do it right, you need a modern approach. Please watch this video to see the exact market problem we are solving today."

【Slide 4】

"As the video just showed, the Opportunity in ESG is massive due to global policies.

But there is a major Problem: ESG assets are highly volatile. When the market panics, traditional 'buy-and-hold' ESG funds suffer massive crashes. Investors want sustainable growth, but they desperately need downside protection.

This brings us to our Investment Philosophy. We believe that true ESG alpha comes from dynamic risk control, not just picking stocks.

That is why we built our Trading Strategy on two simple rules: Machine learning controls the risk, and momentum allocates the capital. Our AI engine acts as an automated gate—aggressively capturing returns during healthy markets, and swiftly cutting risk during market shocks.

To show you exactly how this AI engine works under the hood, I will now pass the time to my teammate. Thank you."
